Definitions of Key Terms

Adjustment Code: The code we assign to describe how we processed a claim line. Generally, the adjustment code shows a correction, adjustment, or denial.

Amount Not Owed: You do not owe this amount because either (1) you chose a network provider that gives us a standing discount, (2) you chose an out-of-network provider that agreed to an amount less than billed, or (3) it is a surprise bill and the law protects you from having to pay it.

Amount Allowed: The most that is available to pay for covered benefits under your plan. For a participating provider, it is an agreed upon amount. If your plan has out-of-network benefits, it is the lower of the billed amount, the amount available for payment using the plan's out-of-network reimbursement rates and rules, or the amount the provider has agreed to accept as payment. Please see your health benefits plan, including your Summary of Benefits for more information.

Amount Billed (Charges): This is the total amount that your provider billed for the services provided to you.

Your Other Insurance Paid: The amount covered by your other health plan when that health plan is "primary".

Amount You Owe: The amount you are responsible to pay. This includes items not covered by your health benefits plan, such as excluded services, penalty amounts, deductibles, coinsurance, copayments and for out-of-network services, amounts about the maximum amount. (The patient responsibility shown on this EOB does not take into account any amounts paid at the time of service).

Billing Provider NPI: The National Provider ID (NPI) of the billing entity responsible for billing a patient for healthcare services.

Claim Number: The number the system assigns to your claim. A claim number is assigned to every claim.

Coinsurance Amount: The portion of the maximum amount you must pay for covered benefits during the plan year. Please see your Summary of Benefits for the coinsurance amount. Coinsurance (when part of your plan) typically does not apply until after you meet the deductible.

Copay Amount: The amount you are required to pay directly to a Provider for in-network covered benefits at the time of the service. Copayments generally apply when receiving services from participating providers. Please see your Summary of Benefits for the applicable copayment amount.

Date(s) of Service: The date the physician or facility performed the service(s).

Description of Service: A brief description of the medical service, supply or medication billed along with the procedure code or Revenue Code. A procedure code is an alpha numeric identifier used to define the medical service, supply or medication billed. A Revenue Code is used by hospitals to report services rendered - revenue codes are three digits.

Deductible Amount: The amount you must pay for covered benefits during the plan year before we begin making payments for covered benefits. Please see your Summary of Benefits for the applicable deductible amount. In most instances, the deductible amount must be met before coinsurance applies.

Patient Non Covered: A service or expense that you do not have coverage for under your health benefit plan.

Rendering Provider: The Rendering Provider is the name of the person or company (laboratory or other facility) who rendered the care.

Rendering Provider NPI: The NPI was put in place so that each provider has one unique, government-issued identifier to be used in transactions with all health plans with which the provider conducts business.
